1. Overview

Tanjiro: The Swordsmith is a 2D top-down action RPG inspired by *Demon Slayer: Kimetsu no Yaiba*.

Your goal is to survive in the world, mine rare ores, craft powerful weapons and armor, and defeat three demon bosses in sequence. The game ends in **victory** when all three bosses are slain, or in **defeat** if the player's HP reaches zero at any point.

Core loop:

```
Mine Ores → Earn Gold from Monsters → Shop / Craft → Enter Boss Room → Repeat
```

---

2. Getting Started

When you launch the game, you are taken to the **Main Menu**. Press **Start** to begin.

You start with:

- A **Wooden Pickaxe** (power: 2)
- No weapon or armor equipped
- 0 Gold

You are placed at the center of the world map and must begin mining and fighting monsters to progress.

---

3. Controls

Input	Action
`W` / ↑	Move up
`S` / ↓	Move down
`A` / ←	Move left

D / →	Move right
Left Click (hold)	Attack monsters in melee range
Right Click (hold)	Mine the tile you are facing
E	Enter a nearby building

> *Diagonal movement speed is automatically normalized so you cannot move faster diagonally.*

---

4. The World Map

The map is a **20×15 tile grid**. It contains:

Element	Description
Ground / Grass	Walkable terrain
Ore Deposits	Mineable rocks scattered across the map
Monsters	Roam freely; aggro when you get close
Shop	Top-left area — buy potions and pickaxes
Crafting Station	Top-right area — craft weapons and armor
Boss Door	Bottom-center — enter to start boss battles

Respawning

- Destroyed ore deposits **respawn** within 1–2 seconds at a random location.
- Defeated monsters **respawn** within 1–3 seconds at a random location.

> *Ores and monsters never run out — the world is always replenished.*

---

5. Mining

Hold **Right Click** while facing an ore tile to mine it. Each click reduces the ore's durability by your pickaxe's power. When durability reaches zero, the ore breaks and drops materials into your inventory.

Ore Stats

Ore	Durability	Drops
Normal Stone	5	1× Normal Stone
Hard Stone	15	2× Hard Stone
Iron	36	3× Iron
Platinum	80	3× Platinum
Mithril	120	3× Mithril
Vibranium	210	3× Vibranium

Pickaxe Power

A higher-power pickaxe reduces durability faster. For example, a Wooden Pickaxe (power 2) takes **18 hits** to break an Iron deposit (durability 36), while an Iron Pickaxe (power 12) breaks it in **3 hits**.

Pickaxe	Power
Wooden Pickaxe	2
Normal Stone Pickaxe	3
Hard Stone Pickaxe	5
Iron Pickaxe	12
Platinum Pickaxe	27
Mithril Pickaxe	45
Vibranium Pickaxe	100

> *Vibranium (durability 210) requires at least a **Platinum Pickaxe** (power 27) to mine in a reasonable number of hits. A Wooden Pickaxe would take 105 hits.*

---

6. World Combat

Hold **Left Click** to attack monsters within melee range. There is a **600 ms cooldown** between attacks.

Monsters that spot you (within ~5 tiles) will chase and attack you. When not aggroed, they wander randomly. After taking damage you have a brief **invincibility window** so you cannot be hit repeatedly.

Monsters

Monster	HP	ATK	DEF	Gold Drop
Easy Monster	40	12	1	20g
Medium Monster	90	22	4	40g
Hard Monster	160	32	8	80g

> *Killed monsters drop gold directly into your wallet and respawn shortly after.*

---

7. The Shop

Walk near the **Shop building** (top-left) and press `E` to enter. The shop sells potions for healing and pickaxes for faster mining. Weapons and armor are **not sold here** — they must be crafted.

Potions

Item	Effect	Price
Small Potion	Restores 40 HP	50g

Medium Potion	Restores 100 HP	100g
Big Potion	Restores 200 HP	200g

Pickaxes

Pickaxe	Power	Price
Wooden Pick	2	5g
Normal Pick	3	10g
Hardstone Pick	5	50g
Iron Pickaxe	12	100g
Platinum Pick	27	160g
Mithril Pick	45	230g
Vibranium Pick	100	310g

> *Buying a higher-tier pickaxe replaces your current one immediately.*

---

8. Crafting

Walk near the **Crafting Station** (top-right) and press `E` to open it. Crafting requires both **materials** from mining and **gold** as a crafting fee.

Crafted items go to your inventory. To gain their stat bonuses, you must **equip** them from the inventory screen.

Weapons

Equipping a weapon increases your **ATK** stat by the weapon's damage value.

Weapon	ATK Bonus	Crafting Cost	Materials Required
Stone Sword	+15	10g	10× Normal Stone
Hardstone Sword	+20	50g	5× Normal Stone, 10× Hard Stone
Iron Sword	+30	100g	5× Normal Stone, 8× Iron
Platinum Sword	+45	160g	8× Iron, 10× Platinum
Mithril Sword	+70	230g	5× Platinum, 15× Mithril
Vibranium Sword	+100	310g	10× Mithril, 15× Vibranium

Armor

Equipping armor increases your **DEF** and **Max HP** stats.

Armor	DEF Bonus	HP Bonus	Crafting Cost	Materials Required

Stone Armor	+5	+10	10g	10× Normal Stone
Hardstone Armor	+10	+15	50g	5× Normal Stone, 10× Hard Stone
Iron Armor	+15	+40	100g	5× Normal Stone, 8× Iron
Platinum Armor	+25	+60	160g	8× Iron, 10× Platinum
Mithril Armor	+40	+100	230g	5× Platinum, 15× Mithril
Vibranium Armor	+55	+150	310g	10× Mithril, 15× Vibranium

> *You can only equip **one weapon** and **one armor** at a time. Equipping a new piece automatically unequips the previous one and returns its stat bonuses.*

---

9. Boss Battles

Walk near the **Boss Door** (bottom-center) and press `E` to enter the boss room. Boss fights are **turn-based** — you and the boss alternate actions.

You must defeat **3 bosses in sequence** without leaving the room. Your HP carries over between fights.

Bosses

Boss	HP	ATK	DEF	Gold Reward
Akaza	500	60	15	900g
Kokushibo	900	80	22	2,100g
Muzan	1,600	100	38	4,500g

> *Boss gold rewards are 3× their base drop value.*

Your Turn — Available Actions

Attack

A normal attack dealing `ATK - Boss DEF` damage (minimum 1).

Skills

Each skill has an individual cooldown measured in turns.

Skill	Effect	Cooldown
⚡ Kagura Dance	Deal **2× ATK** damage to the boss	3 turns
🛡 Dead Calm	Reduce the next incoming hit by **50%**	2 turns
💢 Constant Flux	Deal **3 rapid hits** (3× ATK total), but your DEF is halved next turn	4 turns
💧 Water Wheel	Deal normal damage and **heal 30%** of the damage dealt	5 turns

Defend

Temporarily doubles your DEF for the upcoming enemy turn. Resets after the enemy attacks.

Heal

Opens your potion inventory. Select a potion to consume it immediately.

Rest

Recover `max(5, MaxHP / 10)` HP without using a potion. Counts as your turn.

Enemy Turn

After every player action the boss attacks. Bosses have a **20% chance to land a critical hit** that deals **1.6× damage**.

Damage you receive: `max(0, Boss ATK - Your DEF)`.

Winning & Losing

- Defeat all 3 bosses → **Victory screen**
- Player HP reaches 0 at any point → **Game Over screen**

---

10. Items & Equipment

Potions

Item	Heal Amount
Small Health Potion	40 HP
Medium Health Potion	100 HP
Big Health Potion	200 HP

Potions can be used both during **world exploration** (from inventory) and during **boss battles** (via the Heal action).

Equipment Slots

Slot	Effect
Weapon	Increases ATK
Armor	Increases DEF and Max HP

You can view and change equipment from the **Inventory** screen.

---

11. Damage Formula

All damage in the game follows this formula:

```
Damage Dealt = max(0, Attacker ATK - Defender DEF)
```

If the attacker's ATK is less than or equal to the defender's DEF, the attack deals **0 damage**. This makes DEF very important against high-ATK bosses.

Boss Critical Hit:

```
Critical Damage = Boss ATK × 1.6   (20% chance)
Final Damage = max(0, Critical Damage – Your DEF)
```

---

12. Tips & Strategy

Early game:

- Start by mining **Normal Stone** with your Wooden Pickaxe and craft a **Stone Sword** and **Stone Armor** as soon as possible.
- Kill Easy Monsters to earn early gold for a better pickaxe.

Mid game:

- Upgrade to an **Iron Pickaxe** before attempting to mine Platinum efficiently.
- Craft **Iron** or **Platinum** gear before entering the boss room.

Boss battles:

- Use **Dead Calm** before a boss attack when you anticipate high damage.
- **Constant Flux** deals the most total damage but leaves you vulnerable — use it when your armor can absorb the counter-attack.
- **Water Wheel** is sustainable — use it to stay healed without burning potions.
- Stock up on **Medium or Big Potions** before entering the boss room.
- Use **Defend** instead of a skill when all skills are on cooldown.

Gear recommendation for each boss:

Boss	Recommended Minimum Gear
Akaza	Iron Sword + Iron Armor
Kokushibo	Platinum Sword + Platinum Armor
Muzan	Vibranium Sword + Vibranium Armor
